

DATA SHEET

VAULT STORAGE SERVICES

Why Is Off-site Vault Storage Critical?

A key step in developing a comprehensive and effective disaster recovery plan is to find an off-site location to store backup media and other vital content. After all, keeping media on-site typically turns into a cost-prohibitive, time-consuming process and increases unnecessary risks should disaster strike.

Archive Systems Vaulting Services

Archive Systems minimizes the risks associated with media storage by vaulting your data in state-of-the-art facilities. This includes a temperature and humidity-controlled environment combined with cutting-edge security systems to ensure that records and data are kept safe. Magnetic tapes, CDs, DVDs and other storage media or vital records can be protected.

Our Vault Storage Services also incorporates customized media pickup, delivery and rotation schedules designed to meet the needs of your organization. At pickup, the media is assigned unique barcode ID's for tracking, and then transported in secure, environmentally controlled vehicles by Archive Systems' data protection specialists. In the event of an organization's data failure, Archive Systems is available to deliver the vaulted media 24 hours a day, seven days a week, ensuring business continuity.

Reduce the risk of exposure to your critical data by getting it off-site, offline, and out of reach. Archive Systems provides you with off-site vault storage services to ensure that your company's vital backup data and records remain safe and secure, yet available for rapid recovery – whenever and wherever it's needed.

VAULT STORAGE SERVICES

The Off-Site Vault Storage Solution

Every facet of our service offering has a singular focus – the elimination of risk to your data. Your data is preserved in our state-of-the-art vaults, which feature uninterruptible power supplies, non-combustible construction, gaseous fire protection and sophisticated access-control security systems. In addition, all Archive Systems vaults are managed by trained teams of data protection professionals.

DATA SHEET

SERVICES & BENEFITS

Preserve Strategic Focus

Outsourced data backup storage frees your internal resources and allows you to focus on your business.

Flexible Storage

The vaults can hold a variety of media types, such as:

- Computer disks, tapes, CDs, and DVDs
- Blueprints
- Microfilm and microfiche
- Films and optical disks
- Audio and video tapes
- Paper-based vital records
- X-rays

Ensure Compliance

Compliance is made easier with extensive reporting and auditing features.

Security

Archive Systems' climate controlled, reinforced concrete media vaults meet all ANSI requirements. Access is restricted to only highly-trained personnel via keypad entry.

Fire Prevention

Each vault has four-hour fire ratings, smoke detectors, and automatic fire suppression systems for the ultimate protection.

Customized Programs

Media collection can be customized based on your backup procedures and needs. Emergency delivery is available 24/7, allowing for fast restores during disaster recovery.

Cost Effective

Years of specialization combined with high volumes help Archive Systems achieve increased efficiencies and a lower cost of operation.
